

AIR-RIDE PROCESS TRAILER SPECS

FULL AIRBAG AIR-RIDE SUSPENSION

(not air-shock or air-assist. This is the real deal full airbag air-ride suspension)

Rhino-liner on top and bottom platform layers for quiet smooth ride.

Trailer is 8'6" wide by 24' long when closed.

It widens hydraulically to any desired width up to 14' allowing all doors of picture car to open fully providing easy access for actors.

Trailer platform height is adjustable at the flip of a switch from 8" ride-height from ground to a max of 14" ride-height from ground.

Radio controls for fast and easy operation.

Car can be loaded and unloaded in minutes.

Trailer is split in 4-12' sections allowing the front 12' sections to open wider than rear sections for positioning of cameras without having to open trailer wheels all the way.

Vertical E-Track everywhere for easy lockdown of vehicle and camera/light/grip equipment.

Trailer can carry all possible vehicles from small compact cars to large SUV's and Pick-up Trucks.
